Re: Nomination as Alternate Representative for the World
Radiocommunication Conference Advisory Committee, IB Docket No. 16-185

Dear Ms. Christianson:

It is my pleasure to nominate Scott Bergmann, Vice President of Regulatory Affairs, as CTIA's alternate representative to the FCC's World Radiocommunication Conference Advisory Committee (the "Committee"). Mr. Bergmann would serve as alternate to Thomas C. Power, CTIA's Senior Vice President and General Counsel, who was appointed to the Committee as Chair in July 2016. Mr. Bergmann is willing and committed to serving the Committee through the 2019 World Radiocommunication Conference and attending meetings of the Committee, as well as participating in deliberations of the working groups, as needed. Please note that Mr. Bergmann is not a registered federal lobbyist.

CTIA represents the U.S. wireless industry including wireless carriers and their suppliers, device manufacturers, apps, and content companies. CTIA advocates at all levels of government for spectrum policies that enable Americans to lead a 21st Century connected life. At the FCC, CTIA has played a key role in advancing spectrum policy and identifying additional spectrum bands through filing detailed input into the *Spectrum Frontiers*, 600 MHz Incentive Auction, AWS-3, 3.5 GHz, and other spectrum proceedings. At the executive branch, CTIA advises the Department of Commerce on spectrum policy through participation in the Commerce Spectrum Management Advisory Committee. CTIA also coordinates the industry's voluntary best practices, co-produces the industry's leading U.S. wireless tradeshow, and informs industry stakeholders on spectrum policy through the organization of spectrum policy events designed to foster innovation and efficient use of spectrum. CTIA has the ability to draw upon a vast range of expertise within its membership to support and inform the Committee's efforts to provide the Commission with advice, technical support, and recommended proposals on the full range of issues before the World Radiocommunication

Conference.

As Vice President of Regulatory Affairs, Mr. Bergmann oversees CTIA's Federal Regulatory advocacy, including representing the wireless industry on spectrum policy matters before the FCC and other federal agencies. Mr. Bergmann has testified before Congress and spoken at industry events on a variety of spectrum policy matters.¹ He has previously advised the Commission on a wide variety of policy issues, having served as a representative on the Broadband Deployment Advisory Committee's Model State Code Working Group, the Consumer Advisory Committee, and the Universal Service Administrative Company's Board of Directors. Prior to joining CTIA, Mr. Bergmann served the FCC for over 10 years in a wide range of positions, including Senior Legal Advisor to FCC Commissioner Jonathan Adelstein and Legal Counsel to the Chief of the Wireline Competition Bureau. His experience and expertise make him qualified to serve as CTIA's alternate representative on the Committee.

As the International Telecommunications Union's Radiocommunication sector prepares for the 2019 World Radiotelecommunication Conference, CTIA looks forward to advising the Commission on spectrum policies that will enable the U.S. to maintain its leadership in the telecommunications sector. Please contact me if you need additional information concerning this nomination. The information requested concerning CTIA's alternate representative is as follows:

Alternate Representative

Scott Bergmann
Vice President, Regulatory Affairs
CTIA
1400 16th Street, N.W., Suite 600
Washington, D.C. 20036
